In today's market place energy efficiency is a buzz word for almost any project. Even if you put in the best windows and doors, you can still be losing the energy battle in other areas of the home. Through our testing services you can see what other issues you may be having. Bad insulation, gaps around pipes and outlets, moisture penetration and other issues can make your door and window installation look like it is not performing to expectations. Thermal Imaging is performed with an infra-red heat sensitive camera that clearly shows areas where heat is escaping. There are many areas of a home that loose vast amounts of energy besides the windows and doors. We provide confidential pre-purchase "Thermal Inspections & Moisture Surveys" and are based in Nelson but travel the region.
